

AAM 33 M SSI - BISS - RS485

MULTITURN ABSOLUTE KIT ENCODER

MAIN FEATURES

Miniaturized multiturn absolute kit encoder for high end application. Thanks to high speed interfaces and high resolution it can be used in robotics, motor feedback and CNC machines.

- · Magnetic sensor technology (Patented Energy Harvesting)
- · 50 bit total resolution (18 bit single turn + 32 bit multiturn)
- Power supply up to +12 VDC with several serial interfaces
- · Connector output
- · Hub shaft M3 or M4
- · Operating temperature -40° ... +115°C (-40° ... +239°F)

MAGNETIC SHIELD DESIGN GUIDELINES

In order to eliminate or minimize the influence of external magnetic field interference on encoder operation, use of shielding is mandatory. A recommended design of shielding made of 1.2mm mild steel (SPCC) is given in figure below.

Note:

Please consider that external magnetic interference varies by the application and operating environment, a proper study of external magnetic field and appropriate shield design is needed. Please directly contact our offices for technical assistance.
