

DMP 304

Industrial Pressure Transmitter for Ultra High Pressure

accuracy according to EN IEC 62828-2: standard: 0.5 % span option: 0.25 % span

Nominal pressure

from 0 ... 2 000 bar up to 0 ... 6 000 bar

Output signals

2-wire: 4 ... 20 mA 3-wire: 0 ... 10 V (on request)

Special characteristics

- adjustability of offset and span via front sided potentiometers
- pressure port 9/16" UNF
- 80 % calibration signal with MIL / Bendix plug

Optional versions

- IS-version:
 Ex ia = intrinsically safe for gases
- accuracy according to IEC 60770: 0.25 % span
- pressure port M20x1.5 and M16x1.5

The ultra-high-pressure transmitter type DMP 304 has been especially designed for applications with highest demand on precision and reliability. DMP 304 series is based on a compensated strain gauge, bonded onto a hardened stainless steel diaphragm.

Due to the rugged stainless steel housing usage under extreme conditions and in IS-required areas is no problem.

Preferred areas of use are

hydraulic circuits

water jet cutting

high pressure applications in chemical and petrochemical industry

BD SENSORS s.r.o. Hradišťská 817 CZ – 687 08 Buchlovice
