

Stainless Steel Probe

Stainless Steel Sensor

accuracy according to IEC 60770: standard: 0.35 % span option: 0.25 % / 0.1 % span

Nominal pressure

from 0 ... 1 mH₂O up to 0 ... 250 mH₂O

Output signals

2-wire: 4 ... 20 mA

3-wire: 0 ... 20 mA / 0 ... 10 V

others on request

Special characteristics

- ▶ diameter 27 mm
- small thermal effect
- excellent accuracy
- excellent long term stability

Optional versions

IS-version

Ex ia= intrinsically safe for gas and dust

- SIL 2 (Safety Integrity Level)
- Drinking water certificate acc. to DVGW and KTW
- different kinds of cables
- different kinds of seal materials

The stainless steel probe LMP 307 is designed for continuous level measurement in water and clean or waste fluids.

Basic element is a high quality stainless steel sensor with high requirements for exact measurement with excellent long term stability.

Preferred areas of use are

drinking wa

Water / filtrated sewage

drinking water system ground water level measurement rain spillway basin pump and booster stations water treatment plants

Fuel / Oil fuel storage tank farm

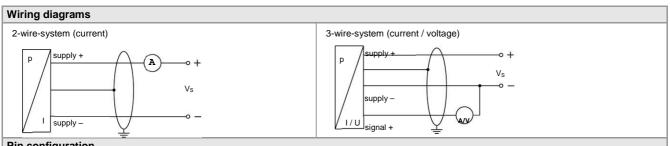

Stainless Steel Probe
